### About ASID

The American Society of Interior Designers (ASID) believes that design transforms lives. ASID serves all sectors of the interior design profession and practice through the Society's programs, networks, and advocacy. ASID was founded over 40 years ago when two organizations became one, but its legacy dates back to the early 1930s. ASID continues to lead the future of interior design, integrating the advantages of local connections with national reach, of small firms with big, and of the places occupants live with the places they work, play, learn and heal.
